Honeywell: Product Management Internship Spring 2023

Pearl Pullan

3 min read · Jan 27

Company : Honeywell (Atlanta, GA — Hybrid)

Role : Product Management Intern, Spring 2023 Coop (24 weeks)

When did you begin applying : October, 2022

Which platform did you apply through for this job : LinkedIn (Saw the job listing on LinkedIn and applied on the company's portal)

Number of rounds : 2 Video Interviews

Round 1

Role of interviewers in the company :

- Sr. Product Manager

- Sr. Director of Product

Questions asked by the interviewers :

1. Introduction and Background

2. What do you know about Honeywell / this role?

3. Projects mentioned on my Resume (Detailed questions and analysis of these projects and my role in it.)

- What was the project about?

- How did you identify the need for it?

- Target customer and cost?

- Why this project/product?

- What could be improved in the project?

4. General questions on my understanding of a product life cycle —

- Difference between a product owner and a product manager?

- What phases of a product life cycle are you interested in?

Questions asked by you :

1. Asked about the job role and functions extensively.

2. How would the day of a product manager at Honeywell look like

3. Further steps of the interview process

Duration before mail for next round : Approximately 1 week

Round 2

Role of interviewers in the company : Sr. Product Manager of the team that I am currently working for.

Questions asked by interviewer :

1. Questions related to my previous work experience

2. What technical tools / technologies have you worked on?

3. What is an API and why is it used?

4. Have you worked on anything related to Data?

5. What is your understanding of a product manager?

Questions asked by you:

1. Asked about the job role and the team.

2. How important are the technical skills for this role and team?

Duration before mail for next round : Got the offer in a week.

Final thoughts

Both the interview rounds were for about 45 mins and they were very insightful.

Honeywell is a great company to work for and has a lot of experienced leaders working on products related to multiple domains. Particularly, Honeywell Forge is a new business domain of Honeywell which has multiple ongoing products — which is a great learning experience to be working for such a big company, yet getting the opportunity to work closely with multiple experienced teams on new product developments.

Few tips that helped me ace my interview:

1. Use STAR method for answers.

2. Be well prepared about everything you mention on your resume.

3. Projects and work experiences (if applicable) would be focused extensively in the interviews since the interviewers are interested in real world experiences and practical knowledge.

4. Be well versed with technical and data analytics aspects for product roles in technology based companies.

5. Be a good listener — the interviewers share a lot of information about the job role / team / company during the interview which can be helpful in answering their further questions / further interview rounds.
